Cairo, Egypt

Summary

As a front-end developer with over a year of experience, I specialize in creating responsive and visually engaging websites. I possess strong leadership abilities, effective time management, and a dedication to maintaining high professional standards. I thrive under pressure and believe in driving positive and impactful results in every project I undertake. Constantly aiming to enhance my skills, I am committed to bringing innovation and creativity to any team while inspiring collaboration and unity.

Experience

Self-Employed - Frontend Developer

(Dec 2022 – Present)

- Successfully completed and delivered **two full-scale projects** as a Frontend Freelancer on Mostaqil, demonstrating expertise in React, responsive design, and modern web technologies.
- Contributed to multiple real-world tasks, enhancing client platforms with **high-quality UI/UX** and seamless API integrations.
- Collaborated with diverse backend technologies like Laravel, Node.js, and .NET, ensuring smooth communication with RESTful APIs.
- Focused on writing maintainable code, optimizing performance, and delivering cross-browser compatible applications.

Projects

Full Stack E-commerce Website [Demo](#) | [Repo](#) | [LinkedIn video](#)

It is an integrated online store project consisting of a frontend and backend and a practical application on Redux Toolkit and a library developed by React and TypeScript . It is consists of more than one page such as the home , cart , register,login ,Products , profile and orders , wishlist page .

Technologies Used (React - TypeScript - Axios - React - bootstrap - React Hook Form - Redux Toolkit (RTK) - Real Backend by Strapi - React Icon - zod for validation - Redux persist)

CRUD management system [Repo](#) | [LinkedIn video](#)

In this project, I paid more attention to the technical part than the design , application focusing on authentication and authorization, token management, protected routes, and session persistence. The project features a dashboard with multiple pages, along with login and registration functionalities.

Technologies Used (React - React-Bootstrap - SweetAlert - Real Backend by php laravel - Real Apis from this Backend)

Full Stack E-commerce Website [Demo](#) | [Repo](#) | [LinkedIn video](#)

It is an integrated online store project consisting of a frontend and backend and a practical application on Redux Toolkit and a library developed by React. It is distinguished by being dark and light mode and consists of more than one page such as the home , cart , register and login page.

Technologies Used (React - Material UI - Axios - Swiper js - React Hook Form - Redux Toolkit (RTK) - Real Backend by Strapi - React Image Gallery - Framer Motion)

Admin Dashboard [Demo](#) | [Repo](#) | [LinkedIn video](#)

It is an admin dashboard project and consists of several pages, which are the main page,team ,contact , profile, calender, FAQ page, and a number of pages using the nivo library. The site is characterized by changing the mode from dark to light .

Technologies Used (React - Material UI - nivo js - Fullcalendar js - React Hook Form)

My Portfolio [Demo](#) | [Repo](#)

This is built with React and showcases my skills through sections like Home, About, Experience, Projects, and Contact. It includes a responsive design, supporting all screen sizes, with both dark and light modes. The project highlights my expertise and features a detailed display of my work and accomplishments. - **Technologies Used (React - Material UI – Json file - Formik - Framer Motion - Formspree)**

Fitness Exercises App [Demo](#) | [Repo](#) | [LinkedIn video](#)

A fitness website providing educational videos and detailed exercise guides, with additional YouTube-sourced content for exploring more exercises and finding the best fit for individual needs.
